Step 8: Place a candle inside your pumpkin (votives are more stable than tapers). Light the candle, put on the lid and turn out the lights. If the candle doesn't stay lit, increase the air supply either by enlarging some of the features or by carving a vent on the back of the lid.

Lastly, put your jack-o'-lantern in a place of honor (away from flammables) and remember to blow out all candles before you go to sleep.
